15. DESCRIPTION OF WANTED PERSON OR MESSAGE

Effective immediately, the Department has added a classification to incident reports documenting the transport of injured persons to medical facilities. The purpose is to give members a further tool to connect Missing Person reports with recent medical calls for service especially in cases where the initial hospital check is negative.

If a MPD member initiates a report for the medical transport of an injured person whose identity is unknown, the report will be classified as **Injured Person to Hospital – John/Jane Doe** in the written report and when obtaining CCNs from the Dispatcher. A separate CAD Event denoting John/Jane Doe has been created to capture this information.

This will allow members conducting a preliminary investigation in a Missing Person case to supplement hospital checks. The Missing Person reporting officer will request the Dispatcher or an OUC Supervisor to review the CAD system for any **Injured Person to Hospital – John/Jane Doe** reports in the time period the person has been missing. This allows the reporting officer to narrow their investigation if any unidentified subjects were on record as being transported in that time period. The name of the supervisor or the ID of the Operator performing this check will be added to the list of notifications in the Missing Person PD 251.

This teletype will remain in effect until incorporated into General Orders 401.01 (Field Reporting System) and General Order 304.03 (Missing Person Reports).
